

UNTAMED S2E10: Teaching the World

Discussion Questions

These discussion questions are designed to be used as a resource that inspires conversation, critical thinking, and promotes a “big picture” understanding of topics covered in each episode. Questions may be answered individually, or out loud in a group setting. Key terms and vocabulary that will help educators and students engage in discussion include:

Teaching, volunteer, internship, fellowship, professional training, career

The following questions are best used when paired with a complete viewing of the full episode, and may be more suitable for advanced levels:

1. Why is conservation-based education important? Do you think the need for this type of education has changed in any way during your lifetime?
2. A number of different jobs within the field of wildlife and conservation-based education were covered throughout this episode. Are there any skills or special training that you think apply to all of them?
3. What sorts of careers exist within the field of conservation? Do you think any of these will change in the future?
4. What are the steps someone can take to become a professional in the world of conservation?
5. What are some of the ways you can inspire and educate others around you about conservation and the environment, even if you're not a professional?

The following questions are best used when paired with a viewing of “Teaching the World: In (About) Two Minutes”, a synopsis of the major themes and key topics covered in the full episode, that may be more suitable for younger audiences:

1. What kinds of jobs are talked about in this episode?
2. Can you picture yourself having a career working with wildlife? What would you want to do, and why?
3. How can you inspire others to care more about the wildlife and the environment?
